

Excelling deep tech through place-based innovation and connected ecosystems for women-led start-ups

EPIC-X is a 24 months Horizon project which aims to accelerate excellence by connecting regional innovation ecosystems across the EU, building on strategic areas of regional strength and specialization, while addressing the innovation divide and underrepresentation of talent within the European Union.

The initiative focuses on empowering and supporting women-led start-ups in the deep technology sector across 16 'moderate' and 'emerging' innovator countries in the EU (Slovenia, Portugal, Hungary, Slovakia, Romania, Italy, Poland, Lithuania, and the Czech Republic, Bulgaria, Estonia, Croatia, Malta, Latvia, Greece, and Spain).

Funding opportunities for women-led startups
